Feiten

Oracle heeft kwetsbaarheden verholpen in Oracle E-Business Suite (Specifiek voor versies 12.2.3 tot 12.2.14).

Duiding

De kwetsbaarheden bevinden zich in verschillende componenten van de Oracle E-Business Suite, waaronder de Enterprise Command Center Framework, CRM Technical Foundation, iSupplier Portal, iStore, User Management, Applications Framework, CRM User Management Framework, Teleservice, Configurator, Application Object Library, en Scripting. Deze kwetsbaarheden stellen ongeauthenticeerde aanvallers in staat om toegang te krijgen tot gevoelige gegevens, wat kan leiden tot ongeautoriseerde toegang, gegevenswijzigingen en zelfs gedeeltelijke denial-of-service.

Oplossingen

Oracle heeft updates uitgebracht om de kwetsbaarheden te verhelpen. Zie bijgevoegde referenties voor meer informatie.
